PROJECTS

M **PORTFOLIO**
Link website: *https://duyminh.tech/*

My portfolio website contains contact information and my projects. The website has features such as automatically switching to light/dark theme based on the device's theme, sending automatic emails with EmailJS, and Google Captcha. The website uses technologies such as HTML, CSS, JS, and supporting libraries such as EmailJS, Scroll Reveal, and Google Captcha.

AS **ART STORE**
Link website: *https://art-store-eta.vercel.app/*

An online art supply store that sells watercolors, oils, etc. The website has features such as online payment, product search, add, delete, and edit products in the cart, login, and logout. The website uses technologies such as ReactJS, HTML, CSS, JS, SCSS, and Ant Design.

HAMA **ADMIN PAGE**
Link website: *https://hama-admin.vercel.app/*

The admin panel is used to track revenue, manage products, and orders. The website has features such as tracking total revenue, adding, deleting, and editing products, and updating the order status of customers. The website uses technologies such as ReactJS, Bootstrap, and Apexcharts.

My position:
- API design and database management.
- Integrate API into website.
- Build login page, category, products and some competent pages like alert, modal.

BATTERY STATUS
Link website: *https://battery-status.vercel.app/*

A website that displays a battery UI with the battery percentage in real time. The website has features such as displaying the color of the battery according to its state, such as charging, full, and low, automatically changing the theme according to the device's theme, and automatically updating the status and battery percentage. The website only uses HTML, CSS and JS.
